

Plant Pregnant Churches

One of our goals in seeing churches not only planted but reproducing.

Longevity will not be reached unless we continue to reproduce.

A great example of this is our 3rd Generation church planter, Pastor Roy.

Pastor Roy has planted 2 churches: one just outside Mega Manila in Laguna, and another in Eastern Mega Manila in an area called PFCI.

Both of these church plants are a result of our 2nd generation church plant in Floodway (many of you have visited the feeding center that also is ministered here) making both PFCI and Laguna 3rd Generation Church plants.

What I really find exciting is the goal of **Pastor Roy and his team was never to just plant a church, but rather to intentionally develop leaders and pastors to go and plant another church.** Through this intentional effort we have our 4th generation church plant under the leadership of Pastor Saldy and another church plant under Pastor Ian.

Both of these men are men of character as well as a great reputation for following the Lord and quite honestly they both work really hard.

What's also built into pastor Saldy's team, is a young man named Jeremy, who will likely one day, also pastor his very own church plant. **Already training our 5th generation church planting team.**

Mid July Pastor Roy celebrated his 7th church anniversary in Laguna. I was there and celebrated along side him, his team, and congregation. **However the true celebration was seeing these young 4th and 5th generation church planters stand and prepare for a great future, making a world of difference.**

We believe the greatest evangelistic tool and Kingdom growth will always be the church and church planting.

This is accomplished by Planting Pregnant Churches.
